

In year 2018, American Wind will be made up of the following renewable resources.

## PROSPECTIVE PRODUCT CONTENT LABEL (2018)<sup>1</sup>

This is a renewable energy certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. The product is sold in blocks of both 500 and 100 kilowatt-hours (kWh). In both cases, the product will be made up of the following renewable resources. For more information, please reference the American Wind section of the footer of [napower.com](http://napower.com) or Green-e's webpage containing Long REC Disclosure language: [www.green-e.org/rec](http://www.green-e.org/rec).

### Green-e Energy Certified New<sup>2</sup> Renewables in AmericanWind<sup>®</sup>

Wind	100%	National
TOTAL	100%	

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. We will annually report to you before August 1 of next year in the form of a Historical Product Content Label the actual resource mix of the RECs you purchased.
2. New Renewables come from generation facilities that first began commercial operation within the past 15 years.

For comparison, the average (2016) mix of energy sources supplying the US includes: Coal (30.4%), Nuclear (19.7%), Oil (.6%), Natural Gas (33.8%), Other Fossil (.03%), and Renewables (14.9%). (from U.S. Energy Information Administration)

The average home in the United States uses 897 kWh per month. [Source: U.S. EIA, 2016]

For specific information about this REC product, please contact North American Power, 1-888-744-2446, [www.napower.com](http://www.napower.com), and [customer@napower.com](mailto:customer@napower.com).

American Wind is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at [www.green-e.org](http://www.green-e.org).
